

SF LTI – Manual Set-up

In some Moodle sites, a manual LTI set-up is required.

To do this, here's the process:

1. **Member: Request Manual set-up data from Brent.**
2. Brent: Manage Institutions > Manual Set-up Information (remove any /sci/ in URLs).
3. **Member: Insert supplied data in your manual LTI set-up (See Page 2).**
4. **Member: Send Manual site set-up data back to Brent (See Page 3).**
5. Brent: Manage Institutions > Manage LTI > Add New Deployment Manually (+ register).
6. **Member: Test.**
