# StudyForge's LTI System

**<span style="color:red">Does my district need more than one SF LTI account?</span>**

**It depends on your situation and plans.**

*Consider:*

**Question 1:  Are you running on a single site for your district (one instance of Moodle or D2L)?**

> If ONE site, then only one LTI account is needed.

> If more than one site, then keep reading.

**Question 2:  Are your two sites totally independent from each other (no overlapping students)?**

> If totally independent, then you probably want two LTI accounts (allows more flexibility).

> If overlapping exists, then keep reading.

**Question 3:  How convenient is some overlap?**

> If one LTI account, then when student (or teachers) using the same email will have one single account within SF.   This allows all their progress, settings, marking, etc. to be available from one account.

> If multiple LTI accounts, then overlapping students (or teachers) will have multiple SF account, which can be confusing for them.
