

## Example Application of "Individual Progress" Plugin

1. Add a page in the intro area to provide some deadline examples. Mine looks like this:

### Sample Schedules

Without a schedule, most students are **NOT** successful in an online course - students **need** goals! Determine the schedule that meets your needs. You can work ahead of your schedule, just not fall behind. Use the schedule ideas below to help you set your deadlines in the "My Schedule" block (in the top-right within the course).

Item	Semester #1	Semester #2
Unit 1	Sept 20	Feb 14
Unit 2	Oct 4	Feb 28
Unit 3	Oct 18	Mar 14
Unit 4	Nov 1	Apr 4
Midterm	Nov 21	Apr 11
Unit 5	Dec 6	Apr 25
Unit 6	Dec 20	May 9
Unit 7	Jan 10	May 23
Unit 8	Jan 24	June 6
Final	Jan 31	June 13

2. Add the block to your course (I put it at the top-right in the course).

## General

# Pre-Calculus Math 11

WCLN - Course Intro Math

Welcome!

**Step 1:** Watch the introductory video (left). You can also update your profile at this point (just click your name in the top-right).

**Step 2:** Read the [Course Outline](#) and make sure you understand the course requirements. Ask your teacher if you have any questions.

**Step 3:** Make a schedule and get started on the course ASAP! Remember, that regular

4. Send out a note to all new students saying something like:

Welcome to Pre-Calc Math 11!

Please take a look at the sample schedule (near the top of the course), then set your own deadlines in the "My Schedule" block (top-right of the course).

This allows you to set-out your own deadlines and keep track of yourself. You can certainly go faster if you wish.

Grab a calendar and set the deadlines that meet your goals. Do you want to be done in December or February or ??? What deadlines lead to that goal?
